

CENTRIFUGAL SINGLE INLET FANS

FKK Series

Single inlet centrifugal fans manufactured from high quality galvanised steel sheet, special designed for continuous extraction of polluted air with medium content of dust, oil mist, at a temperature up to 80°C.

MOTORS

All motors are IP55, Class F Insulation, 4 poles (1400 rpm), with ball bearings greased for life.

Fixed with antivibration mounts .

Electrical supply:

single phase 230V~50Hz

(speed controllable by voltage)

three phase 230/400V~50Hz (up to 3kW)

three phase 400V~50Hz

(suitable for inverter control)

MODEL CODIFICATION:

FKK **1** **2** **3** **4**

1 Inlet diameter (mm):

- from 200 to 450 mm

2 Voltage:

- M: single phase 230V~50Hz

- T: three phase 230/400V~50Hz

3 Motor power (kW):

- single phase from 0,37 up to 2,2 kW

- three phase from 0,37 up to 5,5 kW

4 Outlet position

- standard position: RD 0

RD 0

RD 90

RD 270

APPLICATIONS:

Industrial and commercial applications with medium pressure systems (up to 820Pa). Recommended for industrial and commercial kitchens, for hoods extraction, painting cabins, industrial dryers, textile processing plants etc..

SPECIAL DESIGNED IMPELLER

Special designed impeller (semi-backward), with sparse, wide scooped blades, "spoon type".

Impeller design allows easy cleaning, and prevents oil and dust residue accumulation.

FKK Series

Technical Characteristics

Before installation, make sure that the data listed on the product label (voltage, power, frequency etc.), match with the intended electrical supply.

Three phase motors should be protected by thermal contacts.

Model	Speed (rpm)	Voltage	Max. abs. power (kW)	Max. current (A)		Sound pressure level (dB(A))	Max. airflow (m ³ /h)	Temperature range (°C)		Weight (kg)	Speed controller / Frequency converter
				230V	400V			min.	max.
